Surface Mountable PTC Resettable Fuse: FSMD020-1206-R

1. Summary

- (a) RoHS Compliant & Halogen Free
- (b) Applications: All high-density boards
- (c) Product Features: Small surface mountable, Solid state, Faster time to trip than standard SMD devices, Lower resistance than standard SMD devices
- (d) Operation Current: 200mA
- (e) Maximum Voltage: 30V
- (f) Temperature Range : -40°C to 85°C

2. Agency Recognition

UL: File No. E211981 C-UL: File No. E211981 TÜV: File No. R50090556

3. Electrical Characteristics (23°C)

I_H=Hold current-maximum current at which the device will not trip at 23 °C still air.

I_T=Trip current-minimum current at which the device will always trip at 23℃ still air.

V MAX=Maximum voltage device can withstand without damage at it rated current. (I MAX)

I MAX= Maximum fault current device can withstand without damage at rated voltage (V MAX).

Pd=Typical power dissipated type amount of power dissipated by the device when in the tripped state in 23°C still air environment.

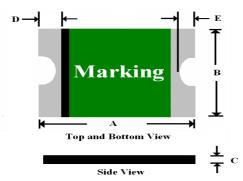

RMIN=Minimum device resistance at 23°C prior to tripping.

R1MAX=Maximum device resistance at 23°C measured 1 hour after tripping or reflow soldering of 260°C for 20 seconds.

Termination pad characteristics

Termination pad materials: Pure Tin

Time 25 ℃ to Peak Temperature: 8 minutes max.

Note 1: All temperatures refer to of the package, measured on the package body surface.

Solder reflow

- Due to "Lead Free" nature, Temperature and Dwelling time for the soldering zone is higher than those for Regular. This may cause damage to other components.
- 1. Recommended max past thickness > 0.25mm.
- 2. Devices can be cleaned using standard methods and aqueous solvent.
- 3. Rework use standard industry practices.
- Storage Envorinment : < 30°C / 60%RH

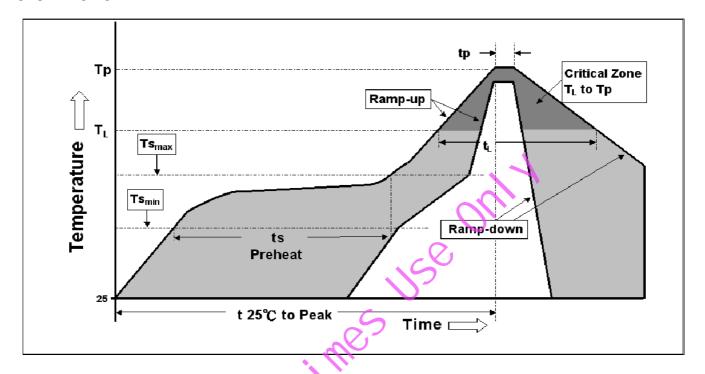

Caution:

- If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
- 2. Devices are not designed to be wave soldered to the bottom side of the board.

NOTE: Specification subject to change without notice.

Reflow Profile

Warning: -Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame

- -PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.
- -Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.
